Procedure
TRIMIX-2000g
Weigh ingredients of phase A and heat the phase to 80°C under agitation into a tank. Weigh ingredients of phase B in a beaker and heat to 80°C with a hot water bath. Then add phase C and D into phase B, and mix with a spatula. Emulsify phase (B+C+D) putting into phase A under agitation at 3000 RPM (TRIMIX). Stop the rotor stator and maintain the other agitation. Cool down to 60°C and put under vacuum. When the formula reaches 30°C break the vacuum and add phase E.

Characteristics

- **Appearance**: Pearly brown fluid emulsion
- **pH**: 6.29
- **Viscosity 1M at RT**: 5620 mPas, s Brookfield S3S6
- **Viscosity 1M at 45°C**: 980 mPas, s Brookfield S2S6
- **Viscosity recovery at RT (after 1M at 45°C)**: 2060 mPas, s Brookfield S2S6
- **Stability**: Stable after 1M at RT & 45°C

Raw materials from SEPPIC

**MONTANOV™ L**
C14-22 Alcohols and C12-20 Alkyl Glucoside
Glucosidic emulsifier in harmony with nature. MONTANOV L is well-suited to formulate different textures (from sprayable to butter cream) no matter the nature or the quantity of fatty phase used. It stabilizes emulsions, and has a strong moisturizing power since it promotes liquid crystals which prevent the skin from dehydration (efficacy proven in vivo). Ecocert and Nature approved.

**EMOGREEN™ L15**
C15-19 Alkane (renewable)
EMOGREEN™ L15 is a non polar and biodegradable, bi-sourced emollient. It’s THE alternative to volatile silicone oils. This high purity vegetable alkane is conformed to Cosmos and Nature. Beyond the lightweight and non-greasy skin feel, it gives a powdery finish. Inert and stable, it can be used in all types of applications, even in extreme conditions (ph, oxidizing/reducing media, etc...).

**EMOGREEN™ L19**
C16-18 Alkane (renewable)
EMOGREEN™ L19 is a non polar and biodegradable, bi-sourced emollient. It’s THE alternative to silicone oils. This high purity vegetable alkane is conformed to Cosmos and Nature. It gives a fresh and gliding touch, with a soft afterfeel. Inert and stable, it can be used in all types of applications, even in extreme conditions (ph, oxidizing/reducing media, etc...).

**SEPIMAX ZEN™**
Polyacrylate Crosspolymer-6
Powder polymer with a MAXIMUM resistance to electrolytes thanks to its high associative behavior. Stable from pH 2 to 8, it enables the creation of formulas with a specific skin feeling, included foaming formulas: rich, velvety and elegant. It is now possible to formulate transparent aqueous gels, cream-gels and emulsions with any kind of active ingredients and to achieve ZEN.

**AQUAXYL™**
Xylitylglucoside and Anhydroxylitol and Xylitol
AQUAXYL™ moisturizes and restructures the skin by harmonizing the hydric flow of the skin. Water reserves are instantly boosted, water circulation is improved in all skin layers and water loss is reduced (in vitro and in vivo tests prove this efficacy). It’s mechanism of action has been validated by dermatogenomics. Ecocert and Nature approved.

**ADIPOLESS™**
Sorbitan Laureate and Lauroyl Proline
A dual action to correct existing "storage skin aspect" inhibits and eliminates fat storage for "Top Model" shape adipocytes (in vivo and in vitro proven efficacy versus placebo). Ecocert approved.

**ADIPOSLIM™**
ChenoPodium Quinoa Seed Extract and Butylen Glycol
Number of functional adipocytes decreased, to maintain your silhouette (proven innovative anti-adipogenesis slimming effect).

Other raw materials...

- Schülke & Mayr:
  - Phenoxethanol and Ethylhexylglycerin: EUXYL PE 9010
  - Phenylnpropandiol and Propanediol: Sensiva PA 40

Other suppliers:
- Mica and Iron Oxides and Titanium Dioxide: CORONA ABORIGINE AMBER (MERCK)
- CI.77019 and CI.77491/ Mica and Iron Oxides: CORONA BRONZE (MERCK)
- Fragrance: PARFUM JUST DELICIOUS (TECHNOCOFR)
