**Raw materials from SEPPIC**
**EMOSMART™ L19**
**C15-19 Alkane**

EMOSMART™ L19 is a high-purity, non polar and biodegradable emollient. It shows an excellent compatibility with all types of oils and helps to disperse minerals (TiO<sub>2</sub>/ZnO). It gives a fresh and vanishing texture with a matt afterfeel. Inert and stable, it can be used in all types of applications, even in extreme conditions (pH, oxidizing/reducing media...).

**EMOSMART™ V21**
**C18-21 Alkane**

EMOSMART™ V21 is a high-purity, non polar and biodegradable emollient. It shows an excellent compatibility with all types of oils. It allows to obtain fresh textures with a soft finish and matt veil. Inert and stable, it can be used in all types of applications, even in extreme conditions (pH, oxidizing/reducing media...).

**LANOL™ 2681**
**Coco-Caprylate/ Caprate**

Emollient agent from vegetable origin. Ecocert approved.

**SEPIMAT™ CP5**
**Methyl Methacrylate Crosspolymer**

SEPIMAT™ CP5 is a versatile texturizing agent, consisting of solid spheres with a smooth surface. These ultra-soft microspheres do not dry out the skin and are perfect for all types of formulations. In formulation, it imparts a soft and powdery feel onto the skin with a matte finish. At higher percentages of SEPIMAT™ CP5 result in a more pronounced powdery feel.

**EPHEMER™**
**Caprylic/Capric Triglyceride and Undaria Pinnatifida Extract**

Extract of gametophytes, macroalgae cells of *Undaria Pinnatifida*. Unique sourcing of these ephemeral cells for an immediate and long lasting antioxidant effect. Specific efficacy on mitochondrial-free-radical reduction (in vitro study). In vivo, after 28 days, the skin strengthen its antioxidant capacity, versus placebo.
