

SOFT MICELLAR MILKY WATER

YUKA COMPLIANT***

Cream
Gel

Aspect : opalescent liquid

Packaging : bottle

98.8%* naturality
99.5%** biodegradability

This minimalist milky micellar water removes make-up and gently soothes your skin. The formula composition is "yuka compliant"***.

ORAMIX™ CG110, vegetable origin surfactant with a low CMC, cleanses and removes make-up from the skin.

SIMULGEL™ NS, polymer based on squalane of vegetable origin, stabilizes the milky water and creates a fresh and melting texture with a quick-break effect. **EMOGREEN™ L19** provides a velvety touch.

ANTILEUKINE 6™ soothes the skin and brings a real feeling of well-being. **AQUAXYL™**, active ingredient with excellent tolerability, boosts all the actors involved in skin hydration (lipids, proteins, hyaluronic acid, NMF).

A micellar care that takes care of the skin!

* Natural origin content according to ISO 16128, result without fragrance, preservatives, colorants

** Amount of water or readily biodegradable ingredients presents in mixture, data from OECD tests, QSAR calculations, products SDS and literature. % without fragrance, preservatives, colorants.

Formula		
A	Aqua / Water SIMULGEL™ NS	Qs 100.00% 1.25%
B	AQUAXYL™	3.00%
C	ORAMIX™ CG 110 EMOGREEN™ L19 Fragrance Benzyl alcohol (and) benzoic acid (and) dehydroacetic acid (and) tocopherol	0.25% 2.00% 0.05% 0.60%
D	Aqua / Water ANTILEUKINE 6™	30.00% 2.00%

Procedure

LABORATORY SCALE - 200g

Prepare phase A gel. Add phase B into phase A. Then add phase C, then phase D. Homogenize between each step.

Characteristics

Appearance	White opalescent liquide
pH	6.1
Viscosity 1M at RT	165 mPa.s Brookfield S2S6
Viscosity 1M at 45°C	135 mPa.s Brookfield S2S6
Viscosity recovery at RT (after 1M at 45°C)	155 mPa.s Brookfield S2S6
Stability*	Stable 1M at RT, 45°C and thermal cycles from -5 to 40°C Stable at centrifugation (3 000 rpm, 20 minutes)

Raw materials from SEPPIC

SIMULGEL™ NS

Hydroxyethylacrylate/Sodium AcryloyldimethylTaurateCopolymer and Squalane and Polysorbate 60

Thickening and emulsifying agent, Simulgel™NS is very easy to use in liquid form (neither pre-dispersion nor neutralization). It provides a sensation of freshness followed by a melting effect on the skin (velvety softness feeling). Simulgel™NS perfectly stabilizes emulsions made at high temperatures.

AQUAXYL™

Xylitylglucoside and Anhydroxylitol and Xylitol

AQUAXYL™ moisturizes and restructures the skin by harmonizing the hydric flow of the skin. Water reserves are instantly boosted, water circulation is improved in all skin layers and water loss is reduced (*in vitro* and *in vivo* tests prove this efficacy). Its mechanism of action has been validated by cosmetogenomics. Cosmos and Natrue approved.

ORAMIX™ CG 110

Caprylyl / Capryl Glucoside

Non-ionic surfactant from vegetable origin. It is an ideal solubilizing agent for foaming products because it solubilizes essential oils, fragrances and preservatives but also boosts foam volume. Its mild cleansing effect is interesting for the formulation of make-up removers, especially for lotions. It is particularly used to emulsify and disperse molecules in cream-gels. Ecocert, Cosmos and Natrue approved.

EMOGREEN™ L19

C15-19 Alkane (Plant-based & Renewable)

EMOGREEN™ L19 is a non polar and biodegradable, bio-sourced emollient. It's THE alternative to silicone oils. This high purity vegetable alkane is conformed to Cosmos and Natrue. It gives a fresh and gliding touch, with a soft afterfeel. Inert and stable, it can be used in all types of applications, even in extreme conditions (pH, oxidizing/reducing media...).

ANTILEUKINE 6™

Caprylic/Capric Triglyceride and Laminaria Ochroleuca Extract

Protector & soothing active, oily soluble, which regulates the inflammation mediators of the skin. It is an *in vivo* immediate soother after an UV exposition.

Other raw materials...

- Schlüke & Mayr

- Benzyl alcohol and benzoic acid and dehydroacetic acid and tocopherol : EUXYL K903

- Other suppliers

- Fragrance : Abricot (Expressions Parfumées)
