COLD PROCESS

Compact powder that is easy to transport, without taking the risk to break it in your handbag!

SEPIFINE™ BB helps oil absorption and provides a matt effect. It leaves a soft and velvety skin finish to the formula. (*Amylopectin*) It is a biodegradable and natural texturizing powder, **ethically sourced** from babassu nut exclusively sourced in Brazil.

SEPIMAX ZEN™ reinforces powder compactness and provides drop resistance, patented by SEPPIC. (*Polyacrylate Crosspolymer-6*)

EMOGREEN™ L15 and **FLUIDANOV™ 20X** act as powder binding agents.

Beyond the lightweight and non-greasy skin feel, **EMOGREEN™ L15** gives a powdery finish. (*C15-19 Alkane (Plant-based & Renewable)*) This **non polar** and **readily biodegradable, plant-based emollient** is an alternative to silicones oils. It is Cosmos approved and Natrue certified.

FLUIDANOV™ 20X is a W/O co-emulsifier with an original xylolipidic structure, that stabilizes W/O & O/W emulsions and improves skin feeling (*Octyldodecanol and Octyldodecyl Xyloside*)

Thanks to **TIMECODE™**, lifted and firmed up, the skin reveal a new radiance! (*Palmitoyl Glycine*)

The best ally against inflamm'aging, it targets the aging key markers. The **TIMECODE™** anti-wrinkles activity is higher to one of the market anti-aging reference (in vivo:78% of the volunteers are satisfied).

SEPICIDE™ LD guaranties a great preservation of the formula.

(*Phenoxyethanol*) **SEPICIDE™ LD** has a good activity against gram-negative micro-organisms, particularly *Pseudomonas Aeruginosa*.
