### Green cream gel/ Packaging: Pump or Tube

pH: 5.2 / **VISCOSITIES: 7D at RT:** 45500cps (M4V6)

**VISCOSITIES: 1M at RT:** 48700cps (M4V6)

**STABILITY:** 3M at RT, 45°C, 3F/T cycles -5°C/+40°C.

### FORMULATION ADVICES: 200 g - Rayneri with defloculator

Disperse the polymer of phase B in the water of phase A and homogenise under a defloculator from 700rpm to 1000 rpm. Prepare phase C then introduce it into phase A progressively under stirring. Shake for 10 minutes at 1500 rpm. Introduce the ingredients of phase D one by one and homogenise between each addition. Add the dyes and homogenise.

COLD  
PROCESS

Enjoy the transformative texture of this light daily serum for a perfect skin complexion.

*Take time to relax on music !*

A glossy cream gel with **SEPI NOV™ WEO** with a quick-break effect (Hydroxyethyl Acrylate/Sodium Acryloyldimethyl Taurate Copolymer)

A **pre-neutralized powder polymeric thickener**, working on a wide pH range (3-12). It also provides excellent **oil stabilizing property** even in presence of a high percentage of oil phase. It imparts satiny and fresh skin feel.

A soft and dry after skin feel with **EMOGREEN™ L19!** (C15-19 Alkane (Plant-based & Renewable))

EMOGREEN™ L19 is a non polar and biodegradable, bio-sourced emollient. It's **THE alternative to silicone oils**. This high purity vegetable alkane is conformed to Cosmos and Natrue. It gives a **fresh and gliding touch**, with a soft afterfeel. Inert and stable.

**ORAMIX™ CG110** as a mild solubilizing agent (Caprylyl / Capryl Glucoside)

Non-ionic surfactant from vegetable origin. Allows solubilizing lipophilic components (fragrances, essential oils, preservatives...).

A duo of actives for a beautiful skin:

**CERAMOSIDES™HP** (Glycosphingolipids & Glycolipids):

The essence of perfect skin. CERAMOSIDES™ HP are an original combination (patented) of natural CERAMIDES and OMEGAs which protect the skin from the loss of elasticity, one of the primary causes of enlarged pores with age.

**HYDRACHRYSUM™** (Aqua/Water - Glycerin - Helichrysum stoechas Callus Culture Lysate) : Bio-inspired, developed using our Cectosomes ecodeign technology Hydrachrysum ensures an intense and long term moisturization. It induces a decrease of pro-inflammatory and an increase of pro-resolutive mediators to allow a return to homeostasis and improved barrier function.

**ADDITIONAL INGREDIENTS:** Cannabis Sativa Seed Oil; HEMP OIL (Sophim) / Moringa Oleifera Seed Oil; MORINGA OIL (Berlin) / Dihydroacetic Acid/Benzyl Alcohol; GEOGARD 22 (Longa) / Perfume Reggae 2143103 (Expressions Parfumes)
