pH (1:3 water dilution): 5.6 / VISCOSITIES: 1M at RT: NA

Recovery at RT (after 1M at 45°C): NA.

STABILITY: M1 at RT, 45°C, -18°C and cycles -5°C/40°C.

FORMULATION ADVICES /Weigh phase A and heat it to 90°C till uniform, homogenize it 4000rpm 2 minutes. Mix phase C and stir till uniform, And heat it to 80°C then add phase D and stir it until uniform. Add phase B to phase A, mix well. Add heated phase C+D to phase A+B, homogenize at 4000 rpm for 3 minutes. Add phase E, stir 5 minutes until uniform, fill in to the moulds at around 70-75°C.

Waterless! Solid cream with melting balm texture for refreshing skin.

EMOGREEN™ L19 (C15-19 Alkane renewable)

EMOGREEN™ L19 is a non polar and biodegradable, bio-sourced emollient. It's THE alternative to silicone oils. It give a fresh and gliding touch, with a soft afterfeel.

MONTANOV™ L (C14-22 Alcohols and C12-20 Alkyl Glucoside)

Glucolipid emulsifier in harmony with nature. MONTANOV™ L is well-suited to formulate different textures (from sprayable to butter cream) no matter the nature or the quantity of fatty phase used. It stabilizes emulsions, and has a strong moisturizing power since it promotes liquid crystals which prevent the skin from dehydration (efficacy proven in vivo).

SEPIMAX ZEN™ (Polyacrylate Crosspolymer-6)

Powder polymer with a MAXIMUM resistance to electrolytes thanks to its high associative behavior. Stable from pH 2 to 8, it enables the creation of formulas with a specific skin feeling, included foaming formulas: rich, velvety and elegant.

SEPINOV™ EMT 10 (Hydroxyethyl Acrylate/Sodium Acryloyldimethyl Taurate Copolymer)

Pre-neutralized powder polymeric thickener on a wide pH range (3-12). It provides also excellent oil stabilizing property even in presence of a high percentage of oily phase. It imparts satiny and fresh skin feel. It can thicken polycols and make anhydrous gels.

AQUAXYL™ (Xylitylglucoside & Anhydroxylitol & Xylitol)

AQUAXYL™ moisturizes and restructures the skin by harmonizing the hydric flow of the skin. Water reserves are instantly boosted and water loss is reduced (in vitro and in vivo tests prove this efficacy).

CODIAVELANE™ BG PF (Aqua/Water and Butylene Glycol and Codium Tomentosum Extract)

Water soluble active extracted from "velvety alga" to facilitate high hydration by its richness in marine sugars.

HYDRALIXIR™ LD (Aqua/Water - Laminaria Digitata Extract)

Cellular water from Laminaria digitata (algae: organic farming / ethical & sustainable harvest): an eco-designed by-product, resulting from an energy efficient process (gentle drying). A natural alternative to replace a part of the freshwater used in cosmetic formulations.

Oily active ingredient, ANTILEUKINE 6™ soothes, reinforces and protects the skin. (Caprylic/Capric Triglyceride and Laminaria Ochroleuca Extract)

It is an immediate soother with anti-ageing benefits that also improves skin quality. It reinforces the basal state of the skin and protects it from UV, blue light and neurogenic stress creating a Daily Soothing Shield!

SEPTONIC™ M3.0 (Magnesium Aspartate and Zinc Gluconate and Copper Gluconate)

Smart mineral complex, it boosts oxygenation and efficacy of other active ingredient in formulas. SEPTONIC™ M3(0) is a cell chrono-energizing and anti-free radical agent designed for hair and skin care. Increasing the cutaneous oxygenation (in vivo proven), SEPTONIC™ M3(0) is active at any age for vitality, skin aging prevention and protection against stress and pollution.
