White base powder
Soothing effect
Whitening

A	SEPIFINE BB™	61.0%
	SOLAGUM™ AX	10.0%
	SEPICALM VG WP	20.0%
<hr/>		
B	Preservative Euxyl 9010	9.0%

To be done by the consumer

PREPARATION ADVICES:

In the bowl add 50ml water and disperse 5g of the facial base powder. Mix it well until it becomes a thick milky solution. Then transfer it to the applicator and keep it in the freezer for few min (until it becomes Ice). Then apply on to the skin.

White Powder / Packaging: Powder sachet

STABILITY: NA

FORMULATION ADVICES:

Mix all the powder and add Sepicalm VG WP and Preservative. Mix it until uniform.

COLD PROCESS

The perfect cryo facial base that leave a fresh afterfeel on the skin.

The refreshing make-up ally!

SEPIFINE™ BB helps oil absorption and provides a mat effect. (Amylopectin)

It is a **biodegradable and natural texturizing powder**, **ethically sourced** from babassu nut exclusively sourced in Brazil. It leaves a soft and velvety skin finish.

SOLAGUM™ AX, combination of natural origin gums, efficiently stabilises the formula. (Acacia Senegal Gum and Xanthan Gum)

Stabilizing and texturizing polymer of natural origin with excellent electrolyte resistance.

SEPICALM™ VG WP soothes skin and reduces pigmentation.

(Sodium Palmitoyl proline & Nymphaea Alba Flower Extract)

A successful marriage between palmitoylproline and water lily flower extract reaching a **unique whitening and soothing effect**: thanks to an action towards both a modulation of inflammation mediators and a reduction of genetic expression of tyrosinase (key enzyme of pigmentation), SEPICALM™ VG WP decreases cutaneous pigmentation induced by stress.

ADDITIONAL INGREDIENTS: Phenoxyethanol, Ethylhexylglycerin; Euxyl9010
