Sun protection that's ready to go

Protect your skin from the sun with one simple action

With its stick format, developed with a **high content of liposoluble UV filters**, this sun protection is your ally for all your practices,

The consistency and hold of the stick are made possible by the combination of **MONTANOV™ 202** and **LANOL P** combined with waxes and butter.

MONTANOV™ 202 (Arachidyl Alcohol and Behenyl Alcohol and Arachidyl Glucoside) Glycolipid emulsifier of plant origin made in France. A liquid **crystal promoter**, it creates **highly stable biomimetic textures**, providing **long-lasting hydration and an immediate restructuring effect** for a smoother skin texture.

LANOL P (Glycol Palmitate) **texture agent** that provides consistency and softness without a soapy effect on application.

EMOGREEN™ L19 provides slip (C15-19 Alkane (Plant-based & Renewable)) is a non-polar, biodegradable emollient of plant origin . It gives a fresh, **slippery feel with a soft finish**. Inert and stable, it can be formulated in all types of applications, even in the most extreme conditions (pH, oxidising/reducing environment...).

ANTILEUKINE 6™ (Caprylic/Capric Triglyceride and Laminaria Ochroleuca Extract) An active ingredient that reinforces the skin's basal state and **protects it from UV, blue light** and neurogenic stress, it is an **immediate soother** with anti-ageing benefits that also improves skin quality.
